Customer Reviews

The chart Quick Study Academic "Nursing Assessment" is a great guide to help "CNA, LPN, LVN, RN" to review their daily medical resources. Those guide help me to go to the point immediately with out let my duties unattended. I ordered a couple of them "Phlebotomy, Medical Terms, EKGs / ECGs, Anatomy II, Nursing, and Nursing Assessment! I love it :) Have a great time.

This worked great during my first year of nursing school when I was learning how to do head-to-toe assessments. I will be graduating in 3 months and I still refer to it every once in a while. It has a TON of info on it!

These laminate quick studies are fantastic for a quick reveiw for an exam and also it puts all of the

important points together. I have most of them, could not have made it through nursing school or NCLEX without them!

like the fact that it has much information at your fingertips for quick and easy access. Hate the fact that it is a three fold guide and it makes it difficult to open without taking it out of the binder. I ended up cutting the last page off so I could access it easily.

The whole series of these items for nurses are a priceless reference for nurses and nursing students alike. Highly recommend them all as a quick reference.

I used this as a study refresher when I left a psych floor and took a position at a medical clinic. Now I keep it in a drawer at work for my colleagues and students passing through.

I ordered several of the Quickstudy guides for nursing school. I love the layout of these and having a significant amount of information easily accessible! I think these will come in handy during school.

I like these Quick Study Guides in general and have used them in other subjects. In this particular case you have in a laminated six-page foldout all the basics needed for performing a comprehensive assessment in each of the body systems. There is even a brief pre-assessment preparation and a post-assessment section for critical analysis and documentation. The beauty of this guide is its portability and brief explanations and reminders that augment your own knowledge base.
