FREE coupon code included in your purchase.*NEW UPDATES TO PALS PROVIDER HANDBOOK * NHCPs recently released an updated version of their Pediatric Advanced Life Support (PALS) Provider Handbook that includes several constructive improvements to an already exceptional handbook. A few of these key features include: elimination of all formatting/sizing issues, enhanced algorithms, and improved overall quality and content of the information presented throughout. With these updates, NHCPs proudly offers one of the most effective and user-friendly PALS Provider Handbooks on the market. Pediatric Advanced Life Support (PALS) Provider Handbook, presented by National Health Care Provider Solutions (NHCPs), is a comprehensive resource intended for health care professionals currently enrolled in a Pediatric Advanced Life Support Certification or Recertification Course. It serves as the primary training material for PALS Certification and Recertification courses provided by National Health Care Provider Solutions (www.nhcps.com). Although it is predominantly intended for use during certification courses, the handbook was also created to serve as daily reference material for both health care professionals and non-health care professionals alike. Information covered in the handbook includes PALS procedures through a variety of emergency situations, in-depth analysis of resuscitation tools, ECG and electrical therapy review, Basic Life Support techniques, and more. Full-page PALS Algorithms, tables, images, and other visual tools are also included within the handbook. All material included in this handbook is delivered in a manner meant to enhance learning in the most comprehensive and convenient way possible.

Customer Reviews

I'm a practitioner and an instructor. I found this easy to navigate (the ebook version and text to speech is also convenient), easy to understand and not redundant. This is an excellent reference book for those who need review, as well as a great study for those who are encountering this material for the first time. I highly recommend this book and have it loaded and ready to go on my tablet.

All the information needed to review for PALS is here. Everything including the algorithms are clear and easy to read and understand. I would recommend this PALS Review manual to anyone needs recertification for PALS.

A very good book. Enjoyed format. My only complaint was that some of the drug charts would not display in their entirety. Some were cut off. Caught in between page turning it seemed. Possibly a fault of my device. All algorithm charts were complete. I downloaded pocket GUIDE which is very good. All in all, I would highly recommend this E book. And I enjoyed it's portability for studying.

This book was an easy read and a satisfying value. Of course I will still need to study the materials provided in the class itself but I definitely feel better prepared now. The text is easy to read and algorithms are well delineated.

Helped me prepare for the initial certification of the Pediatric Advanced Life Support course. I had taken the course many years ago, so only needed to refresh my knowledge and acquaint myself

with the changes over the years. Plus, this was much cheaper than the full manual offered by the American Heart Association.

Exactly what I needed for PALS. The Kindle version of this is amazing. I bought it along with ACLS & BLS. I can take it where ever I go and study at anytime without carrying around all the books. The outline is so easy to follow, and I would highly recommend this PALS handbook.

I wanted a reference that I could use at my leisure. This is a shorten version of the book that I used in the PALS course and formatted for quick reference. Remember it is not as detailed as the course book if you have not taken the PALS course.

I had a difficult time with the new PALS book, I did not feel knowledgeable after studying it so I bought this book. It was not helpful and actually confused some things even more due to inaccuracies. I wish I had a good e-reference for PALS. Some things were good when I was sure that they were correct.
