The collaborative effort of historians and academicians Ronald H. Fritze, Brian E. Coutts, and Louis A. Vyhnanek, *Reference Sources In History: An Introductory Guide* is now in a newly updated and expanded second edition. This seminal reference begins with an initial chapter dealing with historiography, methodology, chronologies, calendars, lists of rulers, historical metrology, and the auxiliary sciences of history (archaeology, genealogy, heraldry, numismatics, paleography, diplomatics, epigraphy, and sigillography); then goes on with specific chapters devoted to bibliographies; book review indexes; periodical guides and core journals; periodical indexes, abstracts, and guides; newspapers; dissertations and theses; government publications and legal

sources; dictionaries and encyclopedias; biographical sources; geographical sources and atlases; historical statistical sources; archives, manuscripts, special collections, digital sites; and microforms. Enhanced with an exhaustive (but thoroughly user friendly) index, this new edition of Reference Sources In History is an ideal and highly recommended addition to secondary school, college, and university History Studies and Study Skills reference and resource collections.

If you are an independent history writer or hobbyist who this book is indispensable. It's like having a reference librarian well versed in history at your beck and call. It's not completely up to date but coupled with online resources for more current material it fills a very big void. If you are a professional researcher who needs to pull up some sources in areas outside your field you may also find the book easier than schlepping down to the library or browsing through bibliographies and works cited pages.
